(54) BOOKLET

COPYRIGHT: (C)1990,JPO&Japio

(57) Abstract:

PURPOSE: To efficiently form a booklet, such as a passport, readable with an OCR by a method wherein a portrait image or the like is transferred to an image receiving layer of a transparent sheet, a character image or the like is printed on an adhesive layer of a substrate sheet opposed thereto, and the both are bonded with each other at the transferred surface and the printed surface thereof.

CONSTITUTION: A portrait image 1b and a signature 1b' are thermally transferred on an image receiving layer 1 of a transparent sheet 2. A character image 1a, a graphic image 1c, and an OCR character image 1d are printed on an adhesive layer 40 of a substrate sheet 3 with an ink containing a carbon component. The both sheets are overlapped and bonded with each other. In this manner, a passport with photograph and others can be automatically produced. OCR characters to be printed with a printer can correspond to various types of specifications.
